PAMGUARD Maintenance and support Activities March - April 2012

Web Site

The primary activity conducted during March and April was finalising of the new website. This is now ready to go live, subject to some final comments on text concerning the Levy which we're waiting on from JIP members.

Support Requests

A total of 49 emails were sent from or received by the PAMGuard team in March and April concerning PAMGuard support, this comprised 4 unique sets of emails concerning bugs, 15 support requests and four others (e.g. requests for links in web site)

Bug Fixing

A number of minor bugs were fixed in preparation for the new Beta release. Details of bug reporting is now available through the new web site at <http://pamguard.org/bugs.php>.

Releases

Beta Release 1.11.01 containing all the features listed in last months report is now ready to download on the new website. This will be available to users as soon as the new site goes live (this has now happened).

Development

We are currently working on support for open Office database systems since the Java / MS Access database interface continues to be a problem for users due to it's slow speed. WE hope to be able to make this functionality available by early summer. Details of all developments projects are available on the New Features page of the web site at <http://pamguard.org/features.php>. Note that not all features are requiring JIP funding.

Downloads

There were 118 downloads of the previous Beta version (1.10.01) in March and April.
